# Introduction

---

SuperFast Site Map is a module for Miva Merchant 5 that can generate a hierarchical site map of your category pages in many formats, all customizable with Store Morph Technology and (x)HTML. It supports category hierarchies up to 5 levels deep.

## Requirements

---

1. Miva Merchant 5.0 or higher
2. MySQL backend – This module has not been tested, nor is it supported, on MivaSQL stores.
3. Miva Merchant Engine v5.06

## Installation

---

### Installing the Module

1. Unzip the module's ZIP file to your hard drive
2. Log into your Miva admin utility
3. Expand the navigation tree next to Global Settings on the left side of the screen
4. Click the link "[Add]" next to the "Modules" link
5. Click the "Upload" button on the right side of the screen
6. In the popup window, click the "Browse" button
7. Browse to the location where you stored the files from extracted from the ZIP file
8. Select NBSITEMAP5.mvc
9. Click the "Upload" button
10. When the module has been uploaded, the small "Upload File" window will disappear, leaving you with the main Miva admin screen visible
11. Click the "Add" button on the main Miva admin screen

## Associating the Module with a Store

1. Under your store on the left side of the admin, click “Utilities”
2. In the module list, you should see an entry for “SuperFast Nested Sitemap”
3. Check the checkbox next to this module and click the Update button

## Entering your License Key

1. After assigning the module to the store, you should see a tab across the top of the right-hand screen in admin labeled “SuperFast Nested Sitemap”
2. Click the tab, and the module will present you with a form for entering your license key
3. Copy-and-paste your license key into the box and click the Update button

# Usage

---

When you installed the module, it should have automatically created an item called “nb\_sitemap”. This item needs to be assigned to the page that your sitemap will be displayed on. To do so, click “Pages” on the left side of your Miva Merchant admin. Then on the right side, find your sitemap page and click its edit button, or create a new page to hold your sitemap. (If you have already activated the default Miva sitemap, the page it created has the code “SMAP”.)

After going to the page, click the “Items” tab at the top. Search for the item called “nb\_sitemap”. To assign it to the page, check the box under the “Assigned” column and then click the “Update” button.

Inside the zip file were two sample template files, called “unorderedList.mvt” and “sectionDivs.mvt”. Both files contain partial SMT (Store Morph Technology) to display the nested categories. The simplest is **unorderedList.mvt**, which displays up to five levels of categories as nested unordered lists, as shown below:

- [Games and Activities](#)
  - [Educational Games](#)
    - [Board Games](#)
      - [Test Cat 1](#)
        - [Fifth Level](#)
      - [Test Cat 2](#)
      - [Test Cat 4](#)
    - [Card Games](#)
    - [Classic Games](#)
    - [Puzzle Games](#)
    - [Solitaire Games](#)
    - [Strategy Games](#)
  - [Outdoor Toys](#)
  - [Water Toys](#)
- [Math Toys](#)
- [Music & Video](#)

The file "sectionDivs.mvt" uses CSS to display categories in columns, with 5 top-level categories and each of its one level of subcategories per column. A sample of this display is shown below:

<b>Accessories</b> Apple Accessories Batteries / Power Supplies Cable Ties / Cable Organizers Camera AC/DC Charger Camera and Car Accessories Camera Power Battery CD/DVD Carry Cases CDRW/DVD, HDD Disk Drive Cell Phone Accessories Cooling Products Flat TV Mounts Game Accessories IO Cards and Devices LCD Monitor Mouse, Keyboard, and Others Office/Home Accessories Printer Toner _ _	<b>DVI and DisplayPort</b> DFP Cables Display Port Cable / Adapter DVI Adapter Cables DVI Adapters DVI Cables DVI Extension Cables / Booster, Repeater DVI KVM Supplies DVI Splitters <b>Gift &amp; Holiday Ideas</b> <b>HDMI</b> HDMI Adapter Cables HDMI Adapters HDMI Cables HDMI Solitters/Extenders.
