

Five Dollar Mods – Copy Products to Another Category

Purpose of Module

Copy Products to Another Category is an administrative module that allows the store owner to assign all of the products from Category A to Category B. To use the module, the store owner should enter the source category (the category the products are already assigned to) and the destination category (the category the products should be assigned to). Products will NOT be unassigned from the original category.

How to Install

- Installing the Module
 - Unzip the module's ZIP file to your hard drive
 - Log into your Miva Merchant admin utility
 - Expand the navigation tree next to Global Settings
 - Next to “Modules” click the “[Add]” link
 - Click the "Upload " button on the right side of admin
 - Click the "Browse" button in the popup window
 - Browse to the location where you stored the files from extracted from the ZIP file
 - Select 5DCOPYPROD5.mvc
 - Click the "Upload" button
 - When the graphic has been uploaded, the small "Upload File" window will disappear, leaving you with the main Miva Merchant admin screen visible
 - Click the "Add" button on the main Miva Merchant admin screen
 - The screen will refresh with the details of the module just installed

- Associating the Module with a Store
 - Under the name of your store on the left side of the Miva Merchant admin, click the link "Utilities"
 - In the module list, you should see an entry for " NetBlazon's Copy Products to Another Category"
 - Check the checkbox next to this module and click Update
 - The screen will refresh and there will be a new tab at the top labeled “Copy Products to Another Category”. Click this link.
 - The next screen will ask you to enter your license key, which you should have received when you purchased the module. Paste the entire license key into the box and then click the “Update” button

Using the Module

To use the module, enter the category code for the source category (the category the products are already assigned to) in the box labeled “Copy Products from This Category Code.” Then enter the destination category (the category you wish to assign the products to) in the box labeled “To This Category Code.” Then click the “Update” button. The screen will refresh with a list of all the products and whether they were newly assigned to the destination category or whether they were already assigned.

Note that this process does not remove existing product assignments from either the source or the destination category.

Support
